WORK EXPERIENCE

Software Engineer — Peramal Services *Pune, Maharashtra | Oct '26 – Present*

- Designed the microservice architecture for an AI-powered applicant tracking system using Spring Boot and React.
- Architected a hybrid MySQL database schema utilizing JSON columns to efficiently store and query unstructured AI-extracted candidate profiles.

Software Engineer Intern — LogicMonitor *Pune, Maharashtra | Jan '26 – Jul '26*

- Engineered an OpenTelemetry fleet management system in Java Spring, Go, and React, supporting real-time orchestration across 200+ collectors.
- Developed a Java control plane leveraging Spring 6 and MySQL, using Redis for state coordination behind automated rollouts.
- Implemented Go OpAMP gateways for real-time state sync, delivering configs over 4MB in under 30 seconds.
- Designed a React dashboard in TypeScript and Tailwind CSS.
- Added rollout batching, status monitoring, and automated rollbacks to keep deploys at zero downtime.
- Contributed to OpenTelemetry Collector Contrib and built local observability tooling.

EDUCATION

University of Mumbai (A. P. Shah Institute of Technology), 2022–2026

Bachelor of Computer Engineering with Honours in AI & ML — CGPA 7.55

12th Grade (HSC): 73.5% • 10th Grade (ICSE): 91%

TECHNICAL SKILLS

Programming: Python, Java, Go (basic), JavaScript, HTML, CSS, SQL

CS Fundamentals: Object-Oriented Programming, Data Structures & Algorithms, REST APIs, Computer Networks

Cloud Computing: AWS (EC2, RDS), Cloud Deployment

Machine Learning: Regression, Classification, Predictive Analytics, TensorFlow, OpenCV, MediaPipe

Generative AI: NLP, LangChain, Agentic AI

DevOps: Docker, Git, GitHub

Web Development: Spring Boot, React, Django, Streamlit

Databases: MySQL, PostgreSQL, Redis, MongoDB

CERTIFICATIONS & ACHIEVEMENTS

- **TCS iON NQT - IT:** Achieved an overall score of **78%** (2339/3000) and **94%** (563.96/600) in the Hands-On Programming Assessment.
- AWS Academy Cloud Foundations — AWS Academy
- AWS Academy Data Engineering — AWS Academy
- Oracle Java Certification — Oracle

PROJECTS

Air Canvas — Hand Gesture Drawing App

- Built a real-time drawing tool with MediaPipe hand tracking and OpenCV, reaching 94% gesture-detection accuracy.
- Sped up input processing by about 35% through better frame handling.
- Added Google Drive auto-sync, cutting file-saving time in half.
- Reworked the UI flow, improving interaction responsiveness by about 30%.

Expense Tracker — Full-Stack Web Application

- Built with Django and PostgreSQL; handled 1,000+ test transactions with stable performance.
- Added secure login, passing all validation tests.
- Built visual charts with Chart.js to make spending patterns easier to read at a glance.
- Tuned database queries, cutting load times by about 45% on larger datasets.

MediMate — AI-Powered Insurance Claim Automation

- Built an NLP pipeline with Transformers, reaching 87–90% accuracy in extracting medical terms.
- Automated claim form filling, cutting manual data entry by about 70%.
- Built a React and Web3.js interface that sped up data retrieval by 40%.
- Used blockchain-backed storage to cut breach risk by about 60%.
